Quote

Nick Mabey, Chief Executive of E3G and author of the idea behind London Climate Action Week said:

“London financed the creation of the climate problem in the 19th century so it is only right that it should become the global hub for delivering the solutions in the 21st century.”

“We have been astonished at the response we have had to this idea from well beyond the usual suspects to include community and cultural organisations, faith groups, and many others.”
