Four key climate opportunities in the spotlight in 2022

Emissions reductions for 1.5C Countries align their climate pledges & implementation policies with a 1.5C pathway

Financing for climate AND development New partnerships of technical/policy support & investment for climate transitions aligned to development goals

Solidarity in addressing climate impacts New finance and cooperation for tackling climate impacts through adaptation and responding to losses & damages

Integrity in the climate regime Hardwiring the accountability measures and technical partnership into the global climate governance system
